- < Eliminated rubberized surfacing, all field events would be on turf
- < Shot put and field jumps would be outside the turf field area
  - o Cinder for both areas
- < Combined lacrosse and soccer into one field
  - o The group asked/noted: If lacrosse will be played, would we need additional ball control compared to soccer?
- < Permanent goal posts could be installed or the foundation for the posts could be installed and posts added in the future.
- < Ball control netting (B) - planned on the south side. The netting could be removed if desired.
- < ADA walkway- current pathway would be sufficient and would be a cost savings not to build a new one (C)
